

Post-It Note Summarization

Summarize the main idea of a paragraph or section of text in one "summary statement." Summary statements should consist of the most important idea of that section in the reader's own words.

- Read the identified text selection.
- After each section, take a post-it note and compose a "summary" of that section.
- Discuss and explain your summary post-it notes with someone in your group.
- Continue the process with the next section.
