Re: Security Cameras

I am writing to request the use of ECA account funds to purchase additional security cameras at CGHS. Last summer, the high school administration and the CGCSC Police Department collaborated on the number and location of additional cameras to address security needs in the building.

After their review, it was determined that ten (10) additional cameras be purchased and installed at the high school. An additional DVR would also be purchase to accommodate the additional cameras. The total cost for this project is \$18,845.37. The specific high school ECA account to be used would be the "Safety Account".

I would appreciate the Board's support to add security cameras at the high school to ensure better monitoring and safety at the high school.
